

Automated Cartridge Ordering System

While on this program I have found it easy.

There is no maintenance, I don't have to do anything, I don't run out of ink, it just makes my job easier and lets me concentrate on other things.

Since being on the system I don't have an over abundance of cartridges. I used to have 30-40 cartridges sitting on the shelf and now there are 8. I haven't got 3-4 cartridges piled up for each different printer, which now means I haven't got money tied up in stock that's not been used.

If you can better utilise your time by doing other constructive work then you will definitely want to install the Automated Ordering System because it takes away that part of your job and you never have to worry about it again.

It makes it easy.

Finally, you can alleviate the hassle of ordering your consumables for your printers, faxes & photocopiers FOREVER with our Print Management System... and there are no contracts!

Quality Printers & Cartridges have implemented one of the smartest systems in the printing industry that allows you to never have to order a consumable for your business devices again.

How does it work?

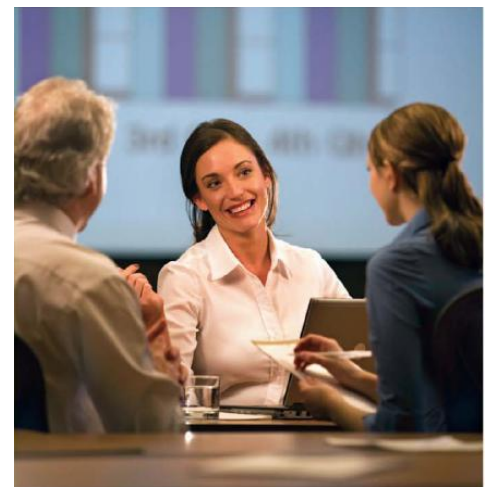

It's a simple program that sends Quality Printers & Cartridges the toner and ink levels of your devices and when the consumable reaches an agreed level (let's say 10%) an email is received by us.

Once we receive the alert advising us your toner or ink is low, we place the order and dispatch to your office for a next day delivery.

There is no fuss, no more running out, no more desperate and urgent deliveries and the best part of it all... **there are no contracts!** It's a **FREE service** we have provided to simply help run your office more efficiently.

How long does it take to set up?

We simply send you a link via email and it takes less than 2 minutes to install.

Manage Your Printing

Not only do we alleviate your ordering headaches, we also can provide you with information such as number of pages printed, copied, scanned on each device and when parts need replacing (before your printer stops working).

We help manage your print environment to:

1. Reduce costs
2. Improve efficiency
3. Avoid costly down time

Please turn over

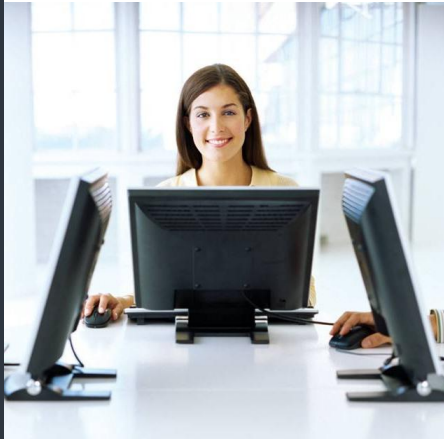

Let us help you take control of your print environment

With secure and reliable technology we can:

- Develop a strategy to MANAGE your print environment
- Identify where you can SAVE money

Automated Cartridge Ordering System

Service Features and Benefits

- You'll never have to order a cartridge again!
- You're cartridges will be ordered and delivered to your door just in time.
- You'll now avoid overstocking your shelves
- You will be more productive with your time – no need to do tedious ordering of cartridges every month.
- You will be more environmentally friendly by not throwing out unused/unwanted cartridges that you have over ordered for
- You will know the right cartridge is ordered for the right device – no more mistakes!
- You will eliminate “emergency” situations where supplies need to be rushed.
- Helps you manage your printing devices knowing how many pages printed, scanned & copied and whether it's in black or colour. So we can analyse how to reduce your costs and increase your efficiency
- Available Australia wide
- It's a free service
- No contracts. You can stop at anytime.
- Setup in less than 2 minutes!

The Automated Ordering System is a great service and it saves me worrying about checking stock constantly and gives me peace of mind, I love it!

The system has helped my company out as now we don't run out of ink when we have 100 orders to print and one of the staff is free from having to do that job.

If businesses don't already have this system installed, I would tell them to go for it and that you are crazy if you don't get onto the Automated Ordering

The professionalism and reputation is 100% along with great service.
